

SUMMARY /

Senior Product Designer & Full-Stack Developer with 15+ years of experience designing, building, and shipping production web and mobile applications. Combining expertise in product strategy, UX/UI, design systems, front-end engineering, and systems architecture, I excel at transforming complex ideas into successful products. As AI accelerates the pace of product development and expands the range of possible solutions, I bring to bear the discernment, systems thinking, and multidisciplinary perspective needed to identify the strongest opportunities, make better decisions, and drive ideas toward successful outcomes.

WORK EXPERIENCE /

CO:CREATE

APR 2025 - APR 2026

Design Lead

Remote

- Led product design for a greenfield universal mobile and web app, for CO:CREATE's premium tattoo booking platform, utilizing user research, analytics, customer interviews, end-to-end testing, and coded prototyping to guide the product from concept to launch.
- Established a new brand identity and comprehensive design system in Figma, later evolving it to support emerging AI-native workflows through a formalized component architecture and detailed implementation guidelines that reduced ambiguity and improved consistency across both human and agent-generated contributions.
- Leveraged agentic coding tools to ship production features independently, reducing handoff overhead and accelerating delivery.

FILES.COM

JUL 2024 - DEC 2024

UI/UX Designer & Front-end Engineer

Remote

- Singlehandedly planned and executed a large-scale redesign & refactor of Files.com's Next.js marketing site, from Chakra UI + CSS Modules to Tailwind + shadcn/ui, reorganized its Prismic CMS, and implemented a complex animation in Framer in just 9 weeks.
- Worked closely with a team of front-end engineers to triage various customer-facing issues and ship two major features in five months for Files.com's flagship React-based SaaS product, along with delivering designs for the new features.
- Built a comprehensive design system & asset library from the ground-up for Files.com's flagship SaaS product and documented its React-based UI in Figma, improving interoperability between its growing design team and its product & engineering teams.

THE FULL PACKAGE FLUTTERBY

OCT 2022 - PRESENT

Co-founder & CTO

New York, NY & remote

- Produced all designs—wireframes, mock-ups, and prototypes—in Figma and contributed over 50% of both front- and back-end code for two brand-new mobile apps built with React Native, Expo, and TypeScript.
- Hired & managed a remote team of developers, completing development ahead of schedule and under budget.
- Designed and implemented geospatial search and a multivariate matching & scoring algorithm using Google's S2 library and Elasticsearch, improving match relevance while reducing operational cost.

DOUBLE GEMINI

MAR 2019 - DEC 2023

Lead Product Designer & Full-stack Developer

New York, NY & remote

- Led product design and development of a suite of SaaS and desktop productivity apps from first principles, producing hundreds...
⋮ (cont'd on next page)

(cont'd from previous page)

...of wireframes and mock-ups and a comprehensive design system, before implementing them in React, TypeScript, & Electron.

- Designed and built multiple iterations of websites for four online productivity training products, contributing to substantial growth in traffic, engagement, and revenue across the business.
- Collaborated with company leadership to design and iterate on courses, presentation materials, course delivery systems, and a Google Workspace add-on that contributed to more than \$2M in closed deals and helped clients save time managing email.

GRO INTELLIGENCE

JAN 2014 - APR 2017

Lead Product Designer & Front-end Developer

New York, NY & remote

- As employee #1 in Gro's NYC office, led product design and early front-end development of its flagship agtech/fintech platform for visualizing and analyzing millions of data points and designed and built multiple iterations of Gro's marketing website.
- Designed dozens of interactive data and geospatial visualizations and organized a complex, global collection of disparate indicators and datasets into a single, unified ontology and intuitive user interface.
- Hired, managed, and mentored a team of designers and developers, as the company expanded from 8 to 50+ employees, helping win early enterprise customers and funding, with *Forbes* eventually predicting the company would reach unicorn status.

ANCIENT WISDOM PRODUCTIONS

JUL 2009 - JUN 2012

Lead Graphic Designer & Front-end Developer

Ithaca, NY & remote

- Won 2012 Webby Award for design of Planned Parenthood's "Pee in Peace" iOS app, as part of its national Out for Health campaign.
- Designed and developed over 60 different websites, web apps, and mobile apps along with visual identities, print collateral, and environmental graphics for Cornell University organizations, regional nonprofits, and local businesses.

SELF-EMPLOYED (FREELANCE)

AUG 2005 - MAR 2019 (ON & OFF)

Product Designer, Graphic Designer, & Full-stack Developer

New York, NY & remote

- Led UX research, product design, web design, print, and environmental design for dozens of companies across tech, retail, and other industries, working closely with founders and clients to transform early business ideas into viable products.
- Front-end, back-end, and API development for a wide variety of web applications, including SaaS, B2B & SEO, social networking, freelancer marketplace, e-commerce, and data management products.

EDUCATION /

CORNELL UNIVERSITY

AUG 2004 - DEC 2008

B.ARCH (5-year—completed in 4.5), Architecture

Ithaca, NY

- Graduated with high honors, cumulative GPA of 3.711
- Studied abroad in Mexico & Brazil (Summer 2006), Rome, Italy (Fall 2007), and New York, NY (Spring 2008)
- Meinig Family Cornell National Scholar, Founded Student Organization, "The Electronic Music Collective".
